### **Under water theme**

Imagine entering an artistic underwater immersive experience where the boundaries between reality and imagination gently blur. Upon arrival, you are enveloped in an ambient glow as soft blue and turquoise lights ripple and cascade across the walls and ceiling, perfectly mimicking the undulating movement of ocean currents overhead.

The dark tunnel transforms into a captivating underwater realm, immersing you in a breathtaking 360-degree oceanic adventure. As you walk through the tunnel, the world around you comes alive—sea turtles glide gracefully overhead, schools of iridescent fish dart past, and lush, vibrant coral gardens stretch along the ocean floor. A lone scuba diver explores in the distance, adding a sense of scale and wonder. Glancing upward, you see the shimmering surface of the water, with sunlight filtering down, and the silhouette of a boat drifting above. A fisherman casts his line, the lure descending into the depths, sparking curiosity about the hidden stories of the ocean.

\*Adding solar lights to extend viewing experience in dark

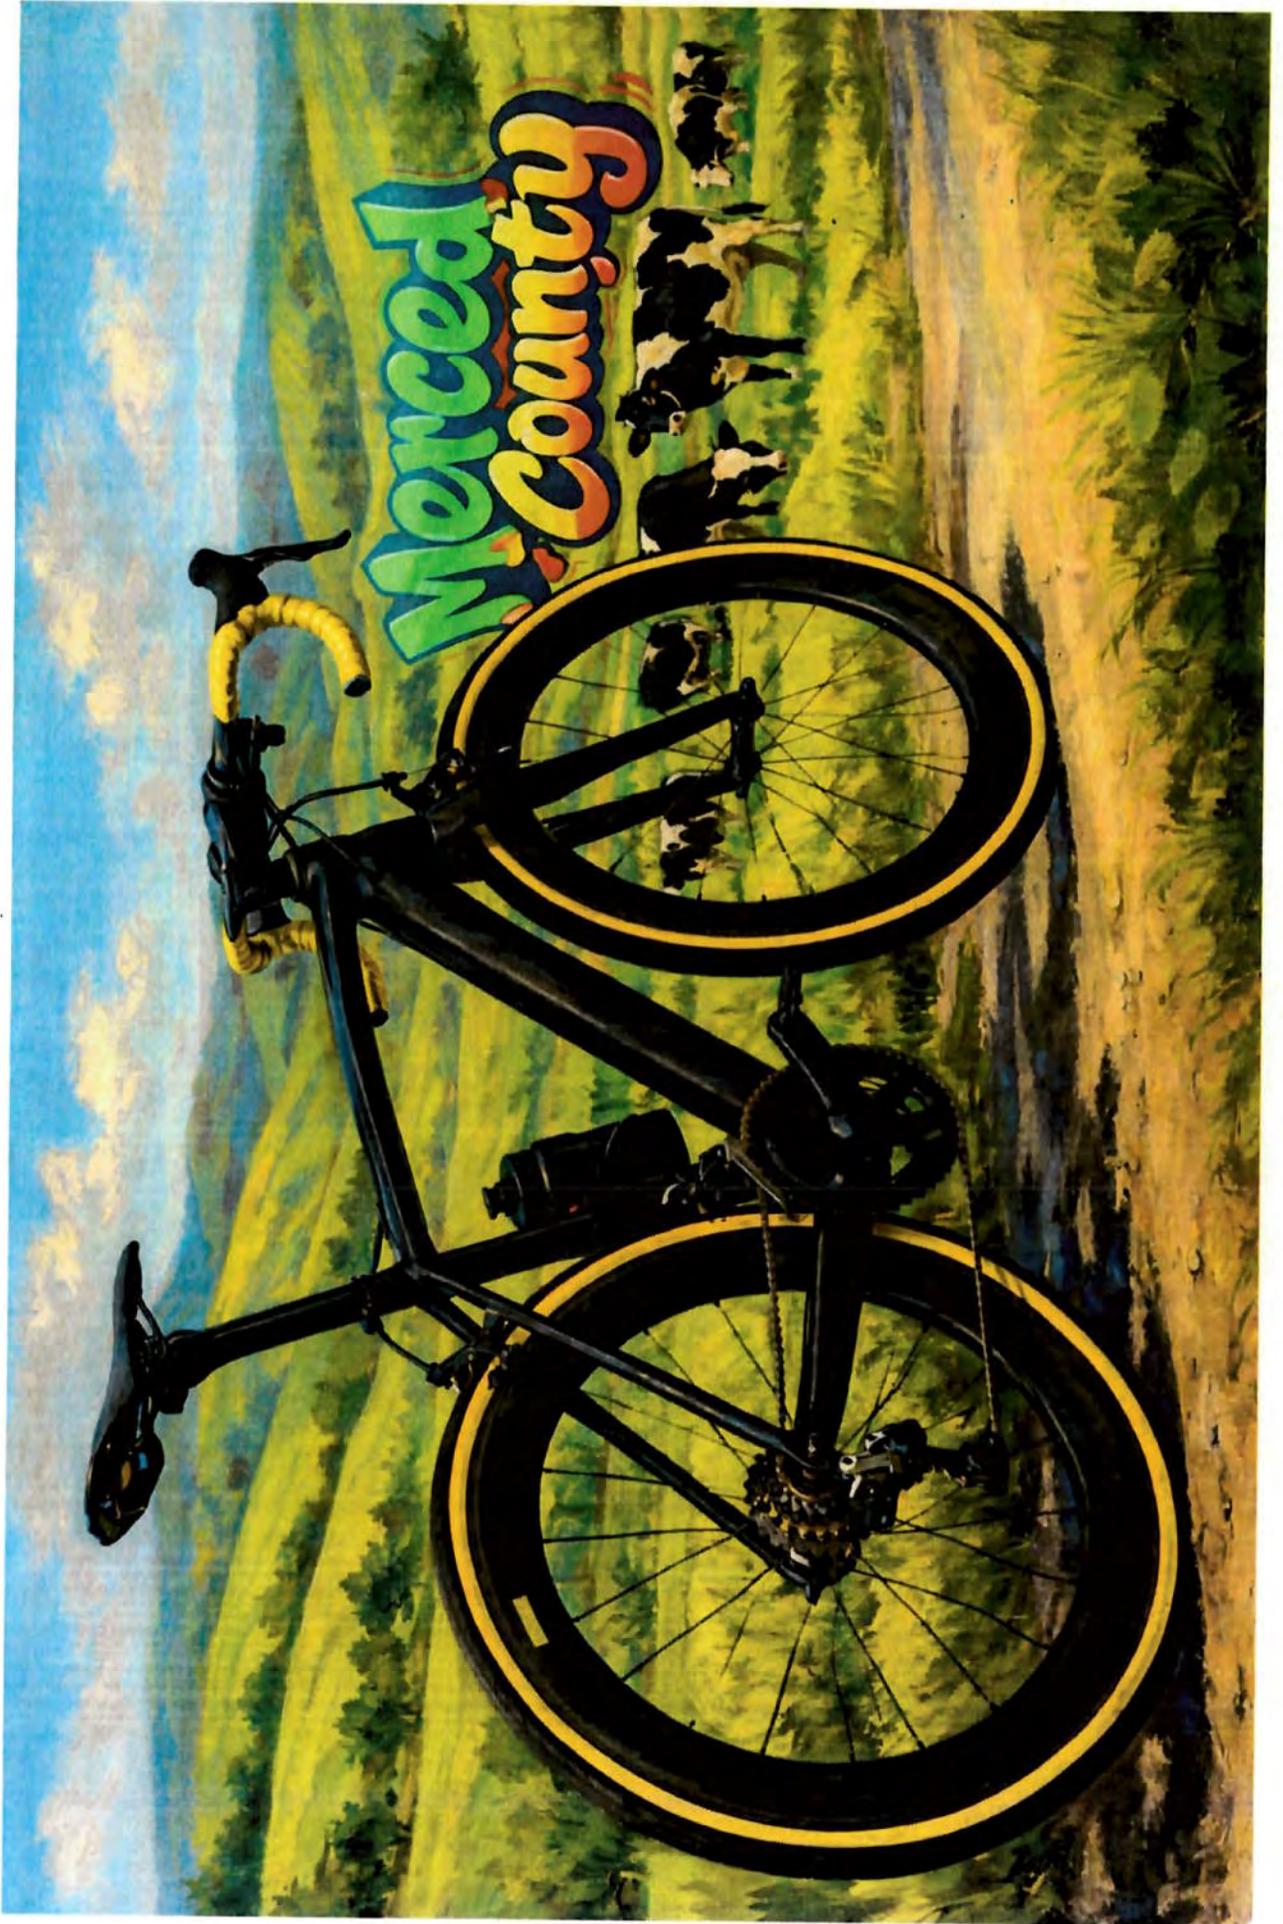

### **Materials and Methodology:**

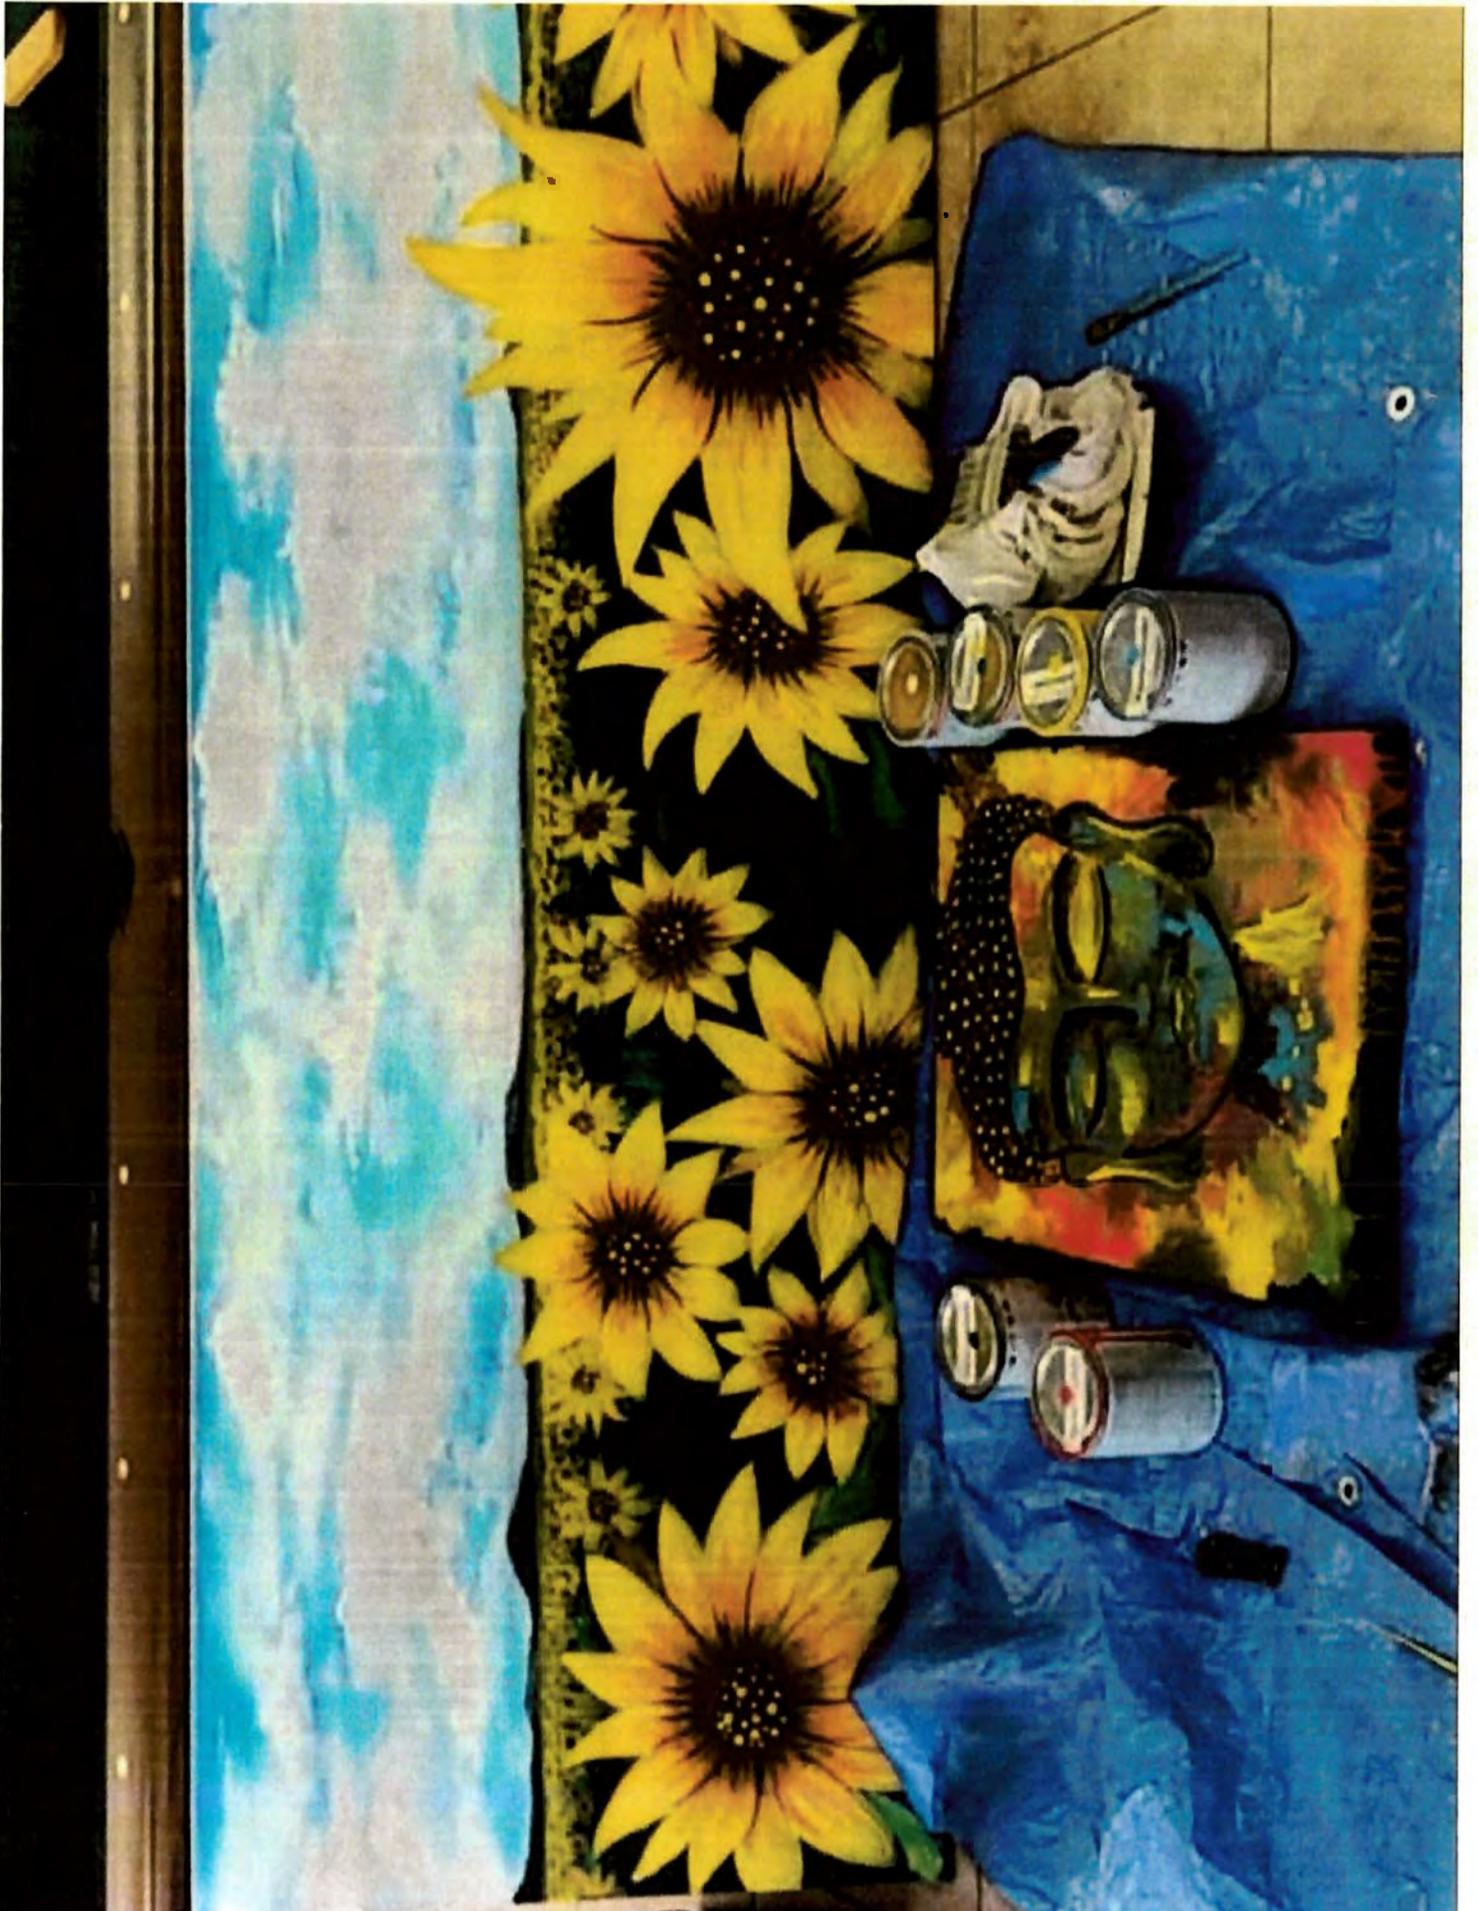

***Sherwin Williams Exterior paint (gal) minimum 2 coats***
