Background

The right-of-way was obtained with the redevelopment of the Westgate Shopping Center to allow for widening of Main Street.

Parking stalls serving the Westgate Shopping Center are located within the right-of-way.

The owner wants the parking stalls to be under their control rather than the City's.

The additional right-of-way is no longer needed.

The General Plan does not address the vacation of right-of-way.

Planning Commission Action

- **Make a Finding of Consistency with the General Plan**
