# Merced Police Department Assembly Bill 481-Military Equipment Use Policy Updated September, 2025 Lt. Pintabona & Lt. Salyers

This document has been created in accordance with California Assembly Bill 481 (AB-481), codified in California Government Code sections 7070-7075.

The equipment identified in this document is stored and or used at the Merced Police Department operated facilities listed below.

#### **Patrol Stations**

Central Station- 611 W 22<sup>nd</sup> Street Merced, Ca 95340 South Station- 470 W 11<sup>th</sup> Street Merced, Ca 95340

The equipment listed in this document is primarily used by the Merced Police Department personnel during a critical incident or tactical operation. These incidents are mission based and may only call for some of the items to be used. Our goal is to resolve these incidents in a manner that will best safeguard the public's welfare, safety, civil rights, and civil liberties. The attempt to resolve each incident without using force or using as minimal force as possible is our primary goal.

A tactical operation or critical incident may be considered as, but not limited to the following:

High risk warrant service
Dignitary Protection
Overwatch
Civil Unrest
Barricaded Subject(s)
Hostage Situation
Active Shooter
Hazardous and explosive devices

It is the policy of the Merced Police Department to ensure we provide adequate public safety services in a transparent manner, including the purchase and use of military equipment. Decisions regarding the use, procurement and funding of military equipment should take into consideration the public's welfare, safety, civil rights and allow for public input.

The Department shall make the following considerations before seeking authorization for purchasing military equipment:

- The equipment is necessary because there is no reasonable alternative that could provide the same objective of officer and civilian safety.
- The equipment is reasonably cost effective compared to alternatives that can achieve the same objectives of officer and civilian safety.

The procurement or use of any new type of military equipment, not already in possession of the Department, or approved on the current Military Equipment Policy, will require the approval of the Merced City Council as outlined in Section 7071(a)(1)(A)- 7071(a)(1)(G). These procedures are also outlined in the Merced Policy and Procedure Manual Section 706.

Merced Police Department Policy and Procedure Manual Section 706 Military Use Equipment may be referred to for additional information regarding:

- The definition and types of military equipment as defined in California Government Code section 7070(c)(1)-(16).
- The approval process for the purchase of any additional military equipment.
- The requirements for the annual review of the Military Equipment Report as defined by California Government Code Section 7071(e).

Violations of the Military Equipment Use Policy by members of the Merced Police Department may result in sanctions including suspension or termination.

#### **TABLE OF CONTENTS**

| 1.0 | Unmanned Aerial System (UAS), Interior Drone and Robots         |
|-----|-----------------------------------------------------------------|
| 2.0 | Armored personnel carriers/Multipurpose wheeled Vehicles        |
| 3.0 | Specialized firearms and ammunition                             |
| 4.0 | Chemical Agents, OC filled projectiles and Flashbang Grenades   |
| 5.0 | 40mm/37MM launchers, Less Lethal Bean Bag shotgun and munitions |
| 6.0 | Inquiry/Complaint process                                       |

#### 1.0 UNMANNED AERIAL SYSTEM (UAS) INTERIOR DRONE AND ROBOTS

#### 1.1 Unmanned Aerial System (UAS)

| DJI Phantom 4                                                                                                         |  |
|-----------------------------------------------------------------------------------------------------------------------|--|
| Commercial UAS                                                                                                        |  |
| 4                                                                                                                     |  |
| Fly, Hover, broadcast video, record video, Photography                                                                |  |
| UAS devices need to be upgraded as software becomes obsolete by vendors. Our current fleet will be upgraded this year |  |
| Commercial grade UAS equipped with UHD capable camera. Has live stream capability and 28 min. flight time             |  |
| Provide Aerial Support for L.E. operations                                                                            |  |
| Investigative purposes Used by licensed and trained personnel to locate persons and provide arial reconnaissance      |  |
| Initial Cost: \$1,399.00  Re-Occurring Costs: \$0  Maintenance Costs: As needed                                       |  |
| Remote Pilot 107 Certification, and 20 hours Merced Police UAS training                                               |  |

| Life Span           | UAS devices need to be upgraded as software becomes obsolete by vendors. Our current fleet will be upgraded this yea.                                       |  |
| Manufacturer's Desc | Commercial grade UAS equipped with UHD capable camera. Has live stream capability and a 25-minute flight time                                               |  |
| Purpose             | Provide Aerial Support for L.E. operations                                                                                                                  |  |
| Authorized Usage    | Investigative purposes Used by licensed and trained personnel to locate persons and provide arial reconnaissance                                            |  |
| Costs               | Initial Cost: \$0 ** Re-Occurring Costs: \$0 Maintenance Costs: As needed ** This drone was taken as evidence and later converted to department use in 2017 |  |
| Required Training   | Remote Pilot 107 Certification, and 20 hours Merced Police UAS training                                                                                     |  |
| Authority for       | Merced PD Policy 608                                                                                                                                        |  |
| Authorized Use      | FAA Part 107 holder and completion of department training Merced City Resolution 2017-57                                                                    |  |

#### 1.2 Surveillance Robots

| Avatar II           |                                                                          |
|---------------------|--------------------------------------------------------------------------|
| Description         | Avatar Tactical Robot                                                    |
| Quantity            | 2                                                                        |
| Capability          | Detect, reduce, and clear threats in complex terrain such as dense       |
|                     | urban areas, and confined spaces. Has the ability to manipulate objects  |
|                     | with articulating arm. Has microphone and loudspeaker to                 |
|                     | communicate through robot                                                |
| Life Span           | Devices need to be upgraded as software becomes obsolete by vendors      |
| Manufacturer's Desc | The AVATAR enhances the capabilities of SWAT and tactical response       |
|                     | teams by allowing them to inspect dangerous situations quickly and       |
|                     | safely, there is no longer a need to send personnel in before you've had |
|                     | a chance to assess the situation                                         |
|                     | The AVATAR saves lives by keeping first responders out of harm's way,    |
|                     | and it does so at a fraction of the price of other robots. The AVATAR    |
|                     | Robots are regarded by tactical teams as a standard operational tool,    |
|                     | like a firearm, vehicle, or piece of body armor. Departments across the  |
|                     | United States and internationally are using the AVATAR Robots            |
| Purpose             | Tactical scouting, moving objects, opening doors                         |
| Authorized Usage    | Barricaded suspect, High risk warrant service                            |
|                     | Used by SWAT inside buildings for safer entry                            |
| Costs               | Initial Cost: \$26,266                                                   |
|                     | Re-Occurring Costs: \$0                                                  |
|                     | Maintenance Costs: As needed                                             |
| Required Training   | No official training required but only SWAT may deploy                   |
| Authority for       | Merced PD Policy 404 and 407                                             |
| Authorized Use      |                                                                          |

#### 1.3 Bomb Squad Robots

|                                 | Remote F6 Robot (Bomb Squad)                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |

| Manufacturer's Desc             | The Remote ANDROS F6A is the most versatile, heavy-duty robot on the market. Speed and agility unite to make it the first choice for a wide range of missions, and its proven stair climbing ability, rugged and dependable chassis, and an arm capable of lifting 65lbs mean that the F6A is more than strong enough to handle any task. The F6A also offers multiple communications options, a chassis and manipulator that allow for unlimited accessories and tool combinations, and quick-release pneumatic wheels for rapid width reduction |
| Purpose                         | To assist in render safe procedures on Bomb Squad incidents                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |

| Manufacturer's Desc             | The Smartest robot in the CALIBER family, the CALIBER FLEX offers a lift capacity of 80 lbs. (36kg). Its Command & Control Unit provides automatic pre-set positioning to facilitate rapid deployment; and a 3D avatar that offers real-time positional feedback on the actual position of the robot. The Robot also comes equipped with flexible and precision controls, IP mesh radios, new and improved lasers with integrated LIDAR distance sensor, 2 speed pan tilt zoom camera and arm control and simultaneous controls. |
| Purpose                         | To assist in render safe procedures on Bomb Squad incidents                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |

| Manufacturer's Desc | The Daniel Defense Delta 5 Pro are bolt operated, magazine fed, rifle chambered in .308 caliber guaranteed to shoot 0.5 MOA or Better.                                                                                                                                                                                |
| Purpose             | The platform is equipped with magnified optics and can be utilized to take precision shots at intermediate to long ranges. The .308 caliber bullet it shoots is also bigger and heavier than a typical .223 caliber bullet from an AR-15 which means it will penetrate barriers like glass with much less deflection. |
| Authorized Usage    | To defend against an imminent threat of serious bodily injury or death. Used by the SWAT team.                                                                                                                                                                                                                        |

| Manufacturer's Desc             | The Bushmaster AR-15 is a lightweight, magazine-fed, gas-operated rifle. Some of the rifles have select fire triggers. Some of the rifles have longer barrels and are designed for longer, more precise shots                                                   |
| Purpose                         | The AR-15 can stop threats of great bodily injury or death at close and intermediate ranges. The AR-15 platform is capable of firing more accurately and quicker than a pistol while holding more rounds in the magazine and having better ballistic qualities  |
| Authorized Usage                | To defend against an imminent threat of serious bodily injury or death.  Used by SWAT and sworn officers                                                                                                                                                        |
| Costs                           | Initial Cost: \$1000.00 per firearm  Re-Occurring Costs: \$0  Maintenance Costs: \$0-\$500 per firearm every 2 years                                                                                                                                            |

| Life Span           | 5-year manufacturer warranty                                                                                                                                                                                                                                                                                                                        |
| Manufacturer's Desc | The Spede-Heat CS Grenade is a high-volume continuous burn device. It expels its payload in approximately 30-40 seconds. The payload is discharged through four gas ports on top of the canister, three on the side and one on the bottom. This launchable grenade is 6.12 inches by 2.62 inches and holds approximately 81.2g of CS chemical agent |
| Purpose             | To safely resolve critical situations such as violent civil unrest and high-<br>risk tactical operations                                                                                                                                                                                                                                            |
| Authorized Usage    | De-escalation tool not likely to inflict serious injury Used by SWAT personnel only                                                                                                                                                                                                                                                                 |
| Costs               | Initial Cost: Approximately \$29.63.00 each Re-Occurring Costs: \$0 Maintenance Costs: None                                                                                                                                                                                                                                                         |

| Manufacturer's Desc             | The Riot Control OC Grenade is designed specifically for outdoor use in crowd control situations with a high-volume continuous burn that expels its payload in approximately 20-40 seconds through four gas ports located on the top of the canister. This grenade can be used to conceal tactical movement or to route a crowd. The volume of smoke and agent is vast and obtrusive. This launchable grenade is 6.0 in. by 2.6 in. and hold approximately 25g of OC chemical agent |

| Manufacturer's Desc | The Pocket Tactical CS Grenade is small, and lightweight. The 25.2g of CS chemical agent will burn approximately 20-40 seconds. At 4.75 in. by 1.4 inches in size, it easily fits in most tactical pouches. The is a launchable grenade; however, it is normally used a signaling or covering device. Though this device is slightly over four inches in length, it produces a smoke cloud so fast it appears to be an enveloping screen produced by a full-size tactical grenade |
| Purpose             | To safely resolve critical situations such as violent civil unrest and high-<br>risk tactical operations                                                                                                                                                                                                                                                                                                                                                                          |
| Authorized Usage    | De-escalation tool not likely to inflict serious injury Used by SWAT personnel only                                                                                                                                                                                                                                                                                                                                                                                               |

| Life Span           | 5-year manufacturer warranty                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
| Manufacturer's Desc | The Saf-Smoke Grenade was designed for training, by may also be used in operations. The Saf-Smoke Grenade offers the same approximate burn times as the Spede-Heat Grenade in CN or CS and the Riot Control Grenade in CN or CS. The similar burn times may make it the appropriate choice for training or simulation deployment of chemical agent canisters. The Saf-Smoke formulation is considered less toxic than Hexachloroethane (HC) smoke. The Saf-Smoke Grenade emits a very white smoke |
| Purpose             | To safely resolve critical situations such as violent civil unrest and high-<br>risk tactical operations                                                                                                                                                                                                                                                                                                                                                                                          |
| Authorized Usage    | De-escalation tool not likely to inflict serious injury Used by the Special Enforcement Detail                                                                                                                                                                                                                                                                                                                                                                                                    |
| Costs               | Initial Cost: \$23.60 Each Re-Occurring Costs: \$0 Maintenance Costs: None                                                                                                                                                                                                                                                                                                                                                                                                                        |

| Manufacturer's Desc             | The Defense Technology OC and CS Vapor Aerosol Grenade is for law enforcement and corrections use to deliver a high concentration of OC in a powerful mist. The grenade is designed for indoor use in confined areas and once deployed, inflames the mucous membranes and exposed skin resulting in an intense burning sensation. The incapacitating effect of the OC Vapor on the subject is dramatic yet requires minimal decontamination. Removing the subject from the affected area to fresh air will resolve respiratory effects within minutes. The OC Vapor Aerosol Grenade is ideal for cell extractions or barricade situations where the use of pyrotechnic, powder or liquid devices is not practical or desired |
| Purpose                         | To safely resolve critical situations such as violent civil unrest and high-<br>risk tactical operations                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |
| Authorized Usage                | De-escalation tool not likely to inflict serious injury Used by SWAT personnel only                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |

| Life Span           | 5-year manufacturer warranty                                                                                                                                                                                                                                                                                                                                                                                 |
| Manufacturer's Desc | The Instantaneous Blast CS Grenade is designed for indoor or outdoor use; this grenade's power is expelled upon initiation of a small internal detonator that has sufficient force to split the cannister at six machined groves on the outside surface. This device is well suited for affecting numerous subjects grouped within a contained portion of a prison yard or area, using wind to the advantage |
| Purpose             | To safely resolve critical situations such as violent civil unrest and high-<br>risk tactical operations                                                                                                                                                                                                                                                                                                     |
| Authorized Usage    | De-escalation tool not likely to inflict serious injury Used by SWAT Personnel only                                                                                                                                                                                                                                                                                                                          |

| Manufacturer's Desc | The CS Flameless Expulsion Grenade is a compact, non-pyrotechnic, chemical agent device that provides safe expulsion without the risk of fire. Its is safe to use inside of a residence. Unlike pyrotechnic grenades, this device's contents are expelled upon actuation of a CO2 cartridge that will affect a confined area of approximately 1500 square feet |
| Purpose             | To safely resolve critical situations such as violent civil unrest and high-<br>risk tactical operations                                                                                                                                                                                                                                                       |

| Capability | Deployed from a SAGE Launcher |
| Life Span  | 5-year manufacturer warranty  |

| Manufacturer's Desc | The BP5 is a non-pyrotechnic barricade penetrating munition capable of delivering micro-pulverizing chemical agents through barricades from a rifled 37MM launcher. The BP5 achieves superior accuracy and penetration through a combination of barrel rifling and projectile design. The projectile is made of frangible plastic and is filled with micro-pulverizing powdered chemical agent. The BP5 is designed to penetrate windows, doors, and other barriers. The micro-pulverizing powder payload is released upon impact |

| Capability          | Deployed from a SAGE Launcher                                                                                                                                                                                                                                                                                                                                                                           |
| Life Span           | 5-year manufacturer warranty                                                                                                                                                                                                                                                                                                                                                                            |
| Manufacturer's Desc | The KO-3 is a direct fire crush nose chemical impact baton round that is designed to be used in situations where a combination of kinetic energy and chemical agents is preferred for the incapacitation of hostile and/or non-compliant individuals. Upon impact the KO-3 projectile imparts blunt trauma and additionally releases a micro-pulverizing CS powder payload as the baton nose is crushed |

| Purpose                         | To safely resolve critical situations such as violent civil unrest and high-<br>risk tactical operations                             |
|---------------------------------|--------------------------------------------------------------------------------------------------------------------------------------|
| Authorized Usage                | De-escalation tool not likely to inflict serious injury Used by SWAT Personnel only                                                  |
| Costs                           | Initial Cost: \$30.00 Each Re-Occurring Costs: \$0 Maintenance Costs: None                                                           |
| Required Training               | SWAT attends annual internal training from SWAT instructor who has been to a 40-hour POST certified chemical agent instructor course |
| Authority for<br>Authorized Use | Merced PD Policy 304 Use of Force Policy                                                                                             |

|---------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Manufacturer's Desc             | The SL6 37mm multi-role six (6) shot projectile launcher fulfills current police requirements for a launcher capable of firing either Sage Control Ordnance, Inc. or ARWEN 37 munitions. Having an accurate multiple shot system available to deliver blunt trauma inducing batons, pyrotechnic chemical agents, and non-pyrotechnic barricade penetrating projectiles has become a necessity for the successful completion of many police operations. Exceptional accuracy by the SL6 is achieved by using a rifled barrel, calibrated sighting system, and a family of ammunition manufactured to standards which maximize performance |
| Purpose                         | Deploying 37mm less lethal impact munitions Deploying 37mm chemical agent (CS) barricade penetrating rounds                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |
| Authorized Usage                | De-escalation tool not likely to inflict serious injury Used by the SWAT Personnel and authorized sworn personnel                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
| Costs                           | Initial Cost: \$2000.00 Re-Occurring Costs: \$0 Maintenance Costs: As needed                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |

| Manufacturer's Desc | The SL1 can deliver accurate blunt trauma inducing batons, combination baton/chemical rounds, non-pyrotechnic barricade penetrating projectiles, as well as pyrotechnic chemical agents. The SL1 achieves exceptional accuracy by combining a rifled barrel, calibrated sighting, and a family of ammunition manufactured to quality standards which maximizes performance. The calibrated sighting system consists of a flip up rear |

|                                 | aperture and a flip up front ballistic ladder calibrated from 20 to 100 meters in 20-meter increments. The five-groove rifling of the SL1 spin stabilizes    |

| Manufacturer's Desc | The BML 37mm multi-role six (6) shot projectile launcher fulfills current police requirements for a launcher capable of firing either Sage Control Ordnance, Inc. or ARWEN 37 munitions. Having an accurate multiple shot system available to deliver blunt trauma inducing batons, pyrotechnic chemical agents, and non-pyrotechnic barricade penetrating projectiles has become a necessity for the successful completion of many police operations. Exceptional accuracy by the BML is achieved by using a rifled barrel, calibrated sighting system, and a family of ammunition manufactured to standards which maximize performance. BML has a detachable magazine |
| Purpose             | Deploying 37mm less lethal impact munitions Deploying 37mm chemical agent (CS) barricade penetrating rounds                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |

| Authorized Usage                | De-escalation tool not likely to inflict serious injury Used by the SWAT Personnel and authorized sworn personnel |

#### 6.0 INQUIRY/COMPLAINT PROCESS

#### Inquires made be made in the following ways:

- In person at any Merced PD station
- By telephone (209) 385-6905
- By mail:

Merced Police Department 611 W. 22<sup>nd</sup> Street Merced, CA 95340

General questions or concerns will be routed to the Administrative Lieutenant for a response within 30 days. The Administrative Lieutenant shall track all inquiries and responses for inclusion in the Military Equipment Use Report.

#### **Complaints**

If you wish to make an allegation of misconduct against a member of the Police Department related to the use of military equipment, you may register your complaint the following ways:

- In person at any Merced PD station
- By telephone or mail to the Internal Affairs Unit (209) 385-6905
   Merced Police Department
   Internal Affairs Unit
   611 W 22<sup>nd</sup> Street
   Merced, CA 95340
- Online through our <u>Submit a Complaint Form</u>
- Formal complaints, warranting further investigation, will be routed to Internal Affairs for review and follow-up, in accordance with statute and policy. The Department will investigate any noncompliance with the Military Equipment Use Policy in accordance with section 832.5 of the California Penal Code, which sets mandatory provisions for complaints made on peace officers as defined by California Penal Code 832 and custodial officers as defined by section 831.5 PC.

The Administrative Lieutenant will conduct annual inspection to ensure the Military Equipment Use Policy is followed and the items listed in the Military Equipment Report are utilized within

policy and in accordance with applicable laws. Any violation of policy or law will be investigated accordingly and reported in the annual Military Equipment Use Report.
