3. PRICING

All Equipment, Products, or Services under this Contract will be priced at or below the price stated in Supplier's Proposal.

When providing pricing quotes to Participating Entities, all pricing quoted must reflect a Participating Entity's total cost of acquisition. This means that the quoted cost is for delivered Equipment, Products, and Services that are operational for their intended purpose, and includes all costs to the Participating Entity's requested delivery location.

Regardless of the payment method chosen by the Participating Entity, the total cost associated with any purchase option of the Equipment, Products, or Services must always be disclosed in the pricing quote to the applicable Participating Entity at the time of purchase.

A. **SHIPPING AND SHIPPING COSTS.** All delivered Equipment and Products must be properly packaged. Damaged Equipment and Products may be rejected. If the damage is not readily apparent at the time of delivery, Supplier must permit the Equipment and Products to be returned within a reasonable time at no cost to Sourcewell or its Participating Entities. Participating Entities reserve the right to inspect the Equipment and Products within ten days after delivery where circumstances or conditions prevent effective inspection of the Equipment and Products at the time of delivery. In the event of the delivery of nonconforming Equipment and Products, the Participating Entity will notify the Supplier as soon as possible and the Supplier will repair or replace nonconforming Equipment and Products with conforming Equipment and Products that are acceptable to the Participating Entity.

Supplier must arrange for and pay for the return shipment on Equipment and Products that arrive in a defective or inoperable condition.

Sourcewell may declare the Supplier in breach of this Contract if the Supplier intentionally delivers substandard or inferior Equipment or Products.

Hot List program and pricing may also be used to discount and liquidate close-out and discontinued Equipment and Products as long as those close-out and discontinued items are clearly identified as such. Current ordering process and administrative fees apply. Hot List Pricing must be published and made available to all Participating Entities.

4. PRODUCT AND PRICING CHANGE REQUESTS

Supplier may request Equipment, Product, or Service changes, additions, or deletions at any time. All requests must be made in writing by submitting a signed Sourcewell Price and Product Change Request Form to the assigned Sourcewell Supplier Development Administrator. To access the contracted Equipment, Products, or Services under this Contract, a Participating Entity must clearly indicate to Supplier that it intends to access this Contract; however, order flow and procedure will be developed jointly between Sourcewell and Supplier. Typically, a Participating Entity will issue an order directly to Supplier or its authorized

subsidiary, distributor, dealer, or reseller. If a Participating Entity issues a purchase order, it may use its own forms, but the purchase order should clearly note the applicable Sourcewell contract number. All Participating Entity orders under this Contract must be issued prior to expiration or cancellation of this Contract; however, Supplier performance, Participating Entity payment obligations, and any applicable warranty periods or other Supplier or Participating Entity obligations may extend beyond the term of this Contract.

Supplier's acceptable forms of payment are included in its attached Proposal. Participating Entities will be solely responsible for payment and Sourcewell will have no liability for any unpaid invoice of any Participating Entity.

B. **ADDITIONAL TERMS AND CONDITIONS/PARTICIPATING ADDENDUM.** Additional terms and conditions to a purchase order, or other required transaction documentation, may be negotiated between a Participating Entity and Supplier, such as job or industry-specific requirements, legal requirements (e.g., affirmative action or immigration status requirements), or specific local policy requirements. Some Participating Entities may require the use of a Participating Addendum; the terms of which will be negotiated directly between the Participating Entity and the Supplier. Any negotiated additional terms and conditions must never be less favorable to the Participating Entity than what is contained in this Contract.

C. **SPECIALIZED SERVICE REQUIREMENTS.** In the event that the Participating Entity requires service or specialized performance requirements not addressed in this Contract (such as e-commerce specifications, specialized delivery requirements, or other specifications and requirements), the Participating Entity and the Supplier may enter into a separate, standalone agreement, apart from this Contract. Sourcewell, including its agents and employees, will not be made a party to a claim for breach of such agreement.

D. **TERMINATION OF ORDERS.** Participating Entities may terminate an order, in whole or in part, immediately upon notice to Supplier in the event of any of the following events:

-----------	----------	------------

9	<p>Provide a brief history of your company, including your company's core values, business philosophy, and industry longevity related to the requested equipment, products or services.</p>	<p>Terex Utilities, founded in 1945 with the advent of the groundbreaking Tel-E-lect digger derrick, has been rooted in the growth and maintenance of this nation's utility infrastructure for well over 70 years. We've seen the good times and the bad and through it all, we've been there for you. We've listened to you when you've approached us with problems that you run into during your daily operations and have turned them into workable solutions for you...throughout your good times and your bad times.</p> <p>Now, as we're traveling together into the 21st century, we are proud to be a part of the next exciting phase of providing you with state-of-the-art solutions steeped in the tradition of those people that built the power and communication grid...hard-working and inventive.</p> <p>Digger Derrick Development</p> <p>The 50's and 60's saw three innovations were introduced that are still in use today - the Rite-Way auger storage bracket. PG (pole grabbing) winch, and the hydraulic collector block. With the latter, for the first time digger derricks could rotate continuously and without restriction making them a much more versatile machine.</p> <p>The Telecon (TElect ECONomy) was introduced which allowed a digger to be mounted on a smaller, lighter and more maneuverable chassis. The Commander I Series digger derrick was developed featuring two innovations that are still used as the standard today, box constructed booms and dual lift cylinders. Also we developed and introduced the first fiberglass third section built to eliminate pin-on third sections. We can't rest on our laurels however, and we're continuing to lead innovations today.</p> <p>Aerial Device Development</p> <p>The 70's, 80's and early 90's saw us broadening our equipment offerings to include aerial devices. The first was named the "Zip Boom" family and consisted of a telescopic aerial and a articulated aerial. A unique fiberglass boom manufacturing process was developed resulting in the Tele-Glass boom. 1992 was a pretty big advancement for us in the aerial device product category as we added one of the best known names to our family - Hi-Ranger. The name still arouses passion and continues to be used as a model designation for all of our aerial devices today. Right on the heels of that announcement was the introduction of the hydraulic lift which allowed aerial devices to add height to the working envelope without adding additional boom length by elevating the complete aerial device 15' higher. We've since added different configurations and heights which gives our products exceptional flexibility. And, of course, we're not done!</p> <p>Auger Drills & Auger Tooling Development</p> <p>We continue to develop our business from the ground up. Not only product development but through research, design, safety and our service channels. As with the recent addition of Auger Drills and Auger Tooling, we continue to expand into markets for continued growth. Compact and powerful Terex Auger Drills offer a wide range of drill speeds and the highest drill torque per class. In addition, Terex offers a vast line of auger tools for hard rock, dirt, and high production drilling, as well as coring systems, pilots, bits, hubs, boring heads, and shank plates.</p> <p>Today, we operate around the globe and we are properly positioned to help you even more. With our products, our innovations and our commitment to being right beside you, we look to partner with you into the next century . . . and beyond!</p> <p>Terex Utilities works for you by listening, responding and delivering solutions with speed. We understand your challenges. We have a diverse team of people who are committed to delivering reliable equipment to you. We work to develop innovative technology and services quickly. Line Item	Question	Response *
39	Describe any product, equipment, maintenance, or operator training programs that you offer to Sourcewell participating entities. Include details, such as whether training is standard or optional, who provides training, and any costs that apply.	Terex offers onsite unit specific mechanic training tailored to the needs of the customer. We also offer operator training ranging from unit in-services to our Digger Derrick and Aerial Device Edge Operator Safety Training Programs. We also offer an extensive online course selection which includes: Aerial Inspections, Digger Derrick Inspections, Dielectric Testing, Driver Safety Training, Hydraulic Troubleshooting, Aerial Edge Operator Safety Training and Digger Derrick Operator Safety Training programs. Additionally we also offer Tech-Tips which take a technician step-by-step through numerous maintenance procedures on our public website.
40	Describe any technological advances that your proposed products or services offer.	Terex builds its reputation on reliability and not just having technological advances but making those technologies robust enough for the environment they are applied into. It is easy to make technological advances it is harder to make them reliable able to stand over time. That is where Terex excels. Terex continues to offer product innovations for safety, performance, green energy, and maintenance.
41	Describe any "green" initiatives that relate to your company or to your products or services, and include a list of the certifying agency for each.	<p>Terex has been down the road of high cost highly complex "Green" technology that provides very little theoretical payback and many times a net negative payback in actual practice. Terex has evolved in our outlook on "Green" Initiatives and in 2015 began developing the HyPower IM system.</p> <p>The HyPower IM system utilizes plug in battery power to do what batteries do best, eliminate idle, but relies on the engine for it to do what it does best and that is move the truck and booms. Terex realized a lower cost, lower weight, less complex system could be developed which eliminated a large part of the fuel burn and carbon emissions as well as noise in the duty cycle of equipment used in utility applications. It was developed around the simple idea of providing the customer the most advantages for the least cost and complexity and achieving a balance which would actually provide an economic benefit for the customer. In 2017 Terex made the decision that it would be the only "Green" system we would offer our customers going forward.</p> <p>In 2019, Terex partnered with Viatic to offer a new version of the HyPower system that operates completely independent from the chassis engine. The latest HyPower system can be upgraded with a variety of charge options and battery sizes. This new system provides real time feedback to the operator for idle hours mitigated, battery life, emissions saved.</p> <p>Terex opened a new manufacturing facility in 2020 that includes an onsite storm water treatment basin and drought resistant plantings, which include approximately 2,000 perennials and shrubs and prairie grass that is supportive of storm water infiltration and pollinator habitat.</p> <ul style="list-style-type: none"> The new facility also utilizes LED fixtures, which have around 54% energy savings and LED Site poles, with around 70% energy savings. <p>Terex works to meaningfully reduce waste and foster a culture of conservation. We continually work to identify waste reduction, recycling and re-use opportunities.</p>
42	Identify any third-party issued eco-labels, ratings or certifications that your company has received for the equipment or products included in your Proposal related to energy efficiency or conservation, life-cycle design (cradle-to-cradle), or other green/sustainability factors.	N/A.
43	Describe any Women or Minority Business Entity (WMBE), Small Business Entity (SBE), or veteran owned business certifications that your company or hub partners have obtained. Upload documentation of certification (as applicable) in the document upload section of your response.	<p>Terex Utilities is committed to providing accredited diverse business enterprises ("DBEs"), such as women, minority and service-disabled veteran owned businesses, maximum practicable opportunity to participate in providing products and services to Terex Utilities. By diversifying our supplier base, we enhance competition and innovation among our suppliers, which helps us to provide our customers with safe, reliable, and market competitive products.</p> <p>Terex Utilities has set a 5% goal on average for spending with DBEs. Terex Utilities achieves this goal through a supplier selection process focusing on local businesses, businesses in close proximity to our manufacturing facility, national DBE public web sites, and those suggest by our customer base.</p>
44	What unique attributes does your company, your products, or your services offer to Sourcewell participating entities? What makes your proposed solutions unique in your industry as it applies to Sourcewell participating entities?	Terex equipment is unique in that we traditionally have not cut corners when it comes to designing our equipment. Our welded derrick boom sections are the hardest boom in the industry to fabricate but provide the strongest strength to weight ratio. The same can be said for our rectangular, tapered fiberglass booms. All of our fiberglass booms are designed to maintain a strong bond with the steel which means they are many times stronger than required to meet industry required safety factors. This cost more money and takes more time but provides a much superior product that will maintain bonding and strength for the life of the equipment when used as designed. This has been the way our products have designed and built going back to the 1950's and a proud tradition we carry on today.

See uploaded reference document, "TUFM 1050 Limited Product Warranty 1" and "Terex Utilities, Terms & Conditions of Sale, U.S". *

How will Sourcewell participating entities in these regions be provided service for warranty repair?	Terex has both certified field services technicians and service branches and leverages the field service and branch support of our dealer partners. *
49	Will you cover warranty service for items made by other manufacturers that are part of your proposal, or are these warranties issues typically passed on to the original equipment manufacturer?	See uploaded reference document, "TUFM 1050 Limited Product Warranty 1" and "Terex Utilities, Terms & Conditions of Sale, U.S". For equipment and install related items, Terex will cover the warranty. If any Buyer credit account purchase is not paid in accordance with Seller's credit payment terms, in addition to any other remedies allowed in equity or by law, Seller may refuse to make further shipments without advance payment by Buyer. Nothing contained herein shall be construed as requiring Seller to sell any Products or Services to Buyer on credit terms at any time, or prohibiting Seller from making any and all credit decisions which it, in its sole discretion, deems appropriate for Seller. Table 11: Pricing and Delivery

Provide detailed pricing information in the questions that follow below. Keep in mind that reasonable price and product adjustments can be made during the term of an awarded Contract as described in the RFP, the template Contract, and the Sourcewell Price and Product Change Request Form.

Line Item	Question	Response *	
56	Describe your pricing model (e.g., line-item discounts or product-category discounts). Provide detailed pricing data (including standard or list pricing and the Sourcewell discounted price) on all of the items that you want Sourcewell to consider as part of your RFP response. If applicable, provide a SKU for each item in your proposal. Upload your pricing materials (if applicable) in the document upload section of your response.	See provided pricing sheet for units and service.	*
57	Quantify the pricing discount represented by the pricing proposal in this response. For example, if the pricing in your response represents a percentage discount from MSRP or list, state the percentage or percentage range.	Percentage range of discount is 2-5% (not including chassis).	*
58	Describe any quantity or volume discounts or rebate programs that you offer.	A Sourcewell discount has been applied to the sale price of the units indicated in the attached document.	*
59	Propose a method of facilitating "sourced" products or related services, which may be referred to as "open market" items or "nonstandard options". For example, you may supply such items "at cost" or "at cost plus a percentage," or you may supply a quote for each such request.	We facilitate these requests by adding "open market items" based on cost plus percentage. A quote is provided for "open market items".	*
60	Identify any element of the total cost of acquisition that is NOT included in the pricing submitted with your response. This includes all additional charges associated with a purchase that are not directly identified as freight or shipping charges. For example, list costs for items like pre-delivery inspection, installation, set up, mandatory training, or initial inspection. Identify any parties that impose such costs and their relationship to the Proposer.	Chassis pricing has been excluded from our pricing response due to challenges acquiring/availability of chassis and related chassis pricing in the current marketplace. PDI & FAI will be included in the "open market items" depending on when the request is made.	*
61	If freight, delivery, or shipping is an additional cost to the Sourcewell participating entity, describe in detail the complete freight, shipping, and delivery program.	Delivery included in the Sourcewell contracted price with exception to Alaska, Hawaii, Canada, or any offshore delivery. These costs would be determined at time of final quote to customer.	*
62	Specifically describe freight, shipping, and delivery terms or programs available for Alaska, Hawaii, Canada, or any offshore delivery.	Additional charges apply for delivery to Alaska, Hawaii, Canada, or any offshore delivery. These costs would be determined at time of final quote to customer.	*
63	Describe any unique distribution and/or delivery methods or options offered in your proposal.	N/A	*

Table 13: Audit and Administrative Fee

Line Item	Question	Response *	
65	Specifically describe any self-audit process or program that you plan to employ to verify compliance with your proposed Contract with Sourcewell. This process includes ensuring that Sourcewell participating entities obtain the proper pricing, that the Vendor reports all sales under the Contract each quarter, and that the Vendor remits the proper administrative fee to Sourcewell. Provide sufficient detail to support your ability to report quarterly sales to Sourcewell as described in the Contract template.	When an opportunity is first opened, the account manager selects "Sourcewell" when inputting in the information triggering the RFQ to use our contract pricing. Terex has one point of contact when it comes to Commercial Terms and another coordinator that tracks the invoicing thru our CRM system. Our system and process has been effective and reporting has been consistently provided to Sourcewell each month and quarterly under the current contract.	*
66	If you are awarded a contract, provide a few examples of internal metrics that will be tracked to measure whether you are having success with the contract.	Sourcewell metrics are tracked through our internal CRM system that provides us information such as past history, # of new opportunities, win rate, and more.	*
67	Identify a proposed administrative fee that you will pay to Sourcewell for facilitating, managing, and promoting the Sourcewell Contract in the event that you are awarded a Contract. This fee is typically calculated as a percentage of Vendor's sales under the Contract or as a per-unit fee; it is not a line-item addition to the Member's cost of goods. (See the RFP and template Contract for additional details.)	Terex proposes a 1% administrative fee to Sourcewell.	*
