SCOPE OF SERVICES

I. IRRIGATION - GENERAL

Irrigation shall be accomplished by the use of automatic or manual sprinkler systems where available and operable. Failure of an existing system to provide full and adequate coverage shall not relieve the contractor of the responsibility to provide proper coverage of all areas. Providing any supplementary hoses, sprinklers, nozzles, etc., necessary to accomplish full coverage shall be the contractor's responsibility.

A. Maintenance

The contractor shall maintain all sprinkler systems in such a way as to give proper coverage and full working capacity, making necessary adjustments to prevent excessive water run-off into streets or other areas not intended to be irrigated. Care shall be taken to prevent wasting water, causing soil erosion, or allowing seepage into existing underground improvements or structures.

The contractor shall, at no cost to the City, keep controller or valve boxes free of dirt and debris; repair, replace, clean, adjust, straighten, raise, or lower the following sprinkler system components as it relates to maintenance of the landscape areas:

1. Sprinkler heads;
2. Sprinkler caps;
3. Sprinkler head risers;
4. Valve covers;
5. Valve boxes;
6. Valve box lids, including electrical pull boxes and lids;
7. Underground electric connectors inside valve boxes;
8. Quick coupler valves and caps;
9. Hose bibs.

B. Inspection

The contractor shall inspect all areas covered by an automatic irrigation system for any malfunction during each schedule service of each District. Approximately thirty (30) days prior to the termination of the contract, a comprehensive test of all irrigation systems shall be made by a Public Works Department representative. Any repairs deemed the contractor's responsibility shall be made by the contractor prior to the end of the contract period.

If repairs made are not to the satisfaction of the Director of Public Works or his designee, deductions shall be made in the final contract payment to cover the cost of eliminating the discrepancies determined by the Director of Public Works or his designee.

C. Repairs

Irrigation systems which are damaged or altered in any way as a result of work performed under this contract shall be repaired or replaced in kind and in an approved manner by the contractor.

Repairs shall be made immediately after damage or alteration occurs, unless otherwise directed. Repairs made as a result of theft, vandalism or an act of God shall be performed by the City.

Winterization – Contractor shall winterize all exposed piping and back flow prevention devices to prevent freeze damage. All damage to back flow devices caused by freezing will be the contractor responsibility to repair or replace.

Repairs not made, or not made to the satisfaction of the Director of Public Works or his designee, will be done by others and billed to the contractor.

D. Irrigation to be accomplished as follows:

Turf and Groundcover - Turf and groundcover areas to be watered, as required, to maintain horticulturally acceptable growth and color, as well as promote deep root growth. Daily shallow water applications should be avoided where possible in favor of deeper water applications. Water to turf and groundcover areas to generally be applied between 3:00 a.m. and 7:00a.m. where possible to lower the risk of fungus in cool season turf.

Banks and Slopes - Sloped landscape areas to be irrigated Monday through Friday as required to maintain horticulturally acceptable growth and color. Best irrigation practice is to promote deep root growth with a minimum of run-off.

Shrubs and Trees - Shrubs and trees to be irrigated as needed to maintain horticulturally acceptable growth and color.

Irrigation rates to be adjusted according to shrubs or tree types and seasonal weather conditions. Deep watering for root growth is encouraged, and surface run-off to be kept at a minimum.

Newly Planted Trees, Shrubs, Groundcover, and Turf - All newly planted areas to receive special attention until plants are established. Adequate water to be applied to promote normal, healthy growth. Watering basins around newly planted shrubs and trees to be used during establishment period.

For the purposes of this specification, a weed shall be considered to be any undesirable plant or plant growing out of place.

All landscaping within the specified maintenance areas including lawns, shrubs, groundcover beds, planters, and tree wells shall be kept free of all weeds at all times. Complete removal of all weed growth is to be accomplished every thirty (30) days on a continuing basis, not just once each thirty (30) days. Weeds may be controlled by mechanical methods, or chemical methods at the discretion of the contractor.

A. Use of Chemical Pesticides for Weed Control

The contractor shall abide by all rules and regulations of the California Department of Pesticide Regulation, Department of Health, Merced County Agricultural Commissioner, and Department of Industrial Relations regarding the safe application of herbicides under this contract. Care shall be taken to ensure the safety of the public and contractor's employees during chemical weed control operations. All posting regulations shall be followed in accordance with current D.P.R. regulations in regards to re-entry times.

Great care shall be taken by the contractor to avoid herbicide drift onto non-target plants.

IV. **PRUNING – GENERAL**

All shrubs, trees, groundcover, and other vegetation growing in the work areas shall be pruned as required to maintain plants in a healthy growing condition. Pruning is to be done in a manner which promotes the plant's natural growth characteristics. Hedging, shearing, or other sever pruning will not be allowed except with prior approval.

Newly planted trees are to be staked, pruned and shaped to promote their eventual development into strong, healthy representatives of their species. Until young trees are strong enough to stand alone, they shall be flex-tied between two approved 2-inch by 2-inch by 8-foot treated tree stakes. Split plastic hose or black tire casing held in place by 12-gauge wire shall be used to secure the young trees. Tree ties to be inspected often for signs of girdling or abrasion.

The contractor shall bring to the Director of Public Works or his designee's attention within 24 hours of any tree which shows signs of root heaving, leaning, having hanger limbs, or in some manner constituting a safety hazard.

V. **LITTER REMOVAL**

During maintenance cycles all trash, debris, and dead limbs shall be removed from landscaped areas to include curb and gutter.

- C. The size and species of replacement plant material shall be determined by the Director of Public Works or his designee.
- D. Where there is a difference in value between the tree lost and the replacement tree, the difference will be deducted from the contract payment.

The value will be deducted from the contract payment. The value will be determined using the latest I.S.A. guidelines.

Any plant damaged or lost through theft, vehicular damage, act of God, or other mysterious sources not the responsibility of the contractor, shall be replaced by the City.
