1. Are you a QUALIFIED ELECTOR of Merced City? *(Registered to vote in a City election.)*
- Yes No

2. List past or present involvement in community-related activities *(i.e., committees, volunteer work, commissions, boards, etc.)*

As I reflect on previous community work, I often think about the service completed during my time in church. Whether it was handing out flyers, collecting donations, or even attending every mass. This of course was through my love for not only Christ, but also my community. Other volunteer work I have done is helping small businesses like the restored thrift store when I volunteered and helped to organize and shelf donations (clothes, books, etc)

3. State your understanding of the purposes, responsibilities, and services offered by the board, commission, or committee for which you are applying.

I understand that working for the city is a great honor. One in which I must seek and research every topic and concern related to its responsibilities and people. Understanding and conveying everyone's problems and solutions. To see, plan for the future and lay out the ground work for a better city. Taking everyone's input, working with colleagues and reporting to others.

4. List any training, education, or experience that you feel would be advantageous to the board, commission, or committee.

My experience in blue collar work like welding, construction, and trucking could be a great help to the city for new and different opinions. Welding has taught me how to look at problems and solve them the most efficiently. How to relocate materials and fix new problems that arise; as well as prevent and plan for hiccups. Construction work has taught me how to be relentless. To plan with my team, allocate materials and set a schedule. When things are needed to be done, when material like concrete need to arrive, who and where to allocate people and how to work directly with others to accomplish the same goal while also providing reporting to superiors. Finally, my work in trucking above all has taught me patience and logistics. Planning the routes ahead of me and not sweating over minor and even big inconveniences. Prioritize, work and accomplish.

5. State your reasons for submitting this application and what you expect to accomplish on this board, commission, or committee.

Above all I would love to further help my ever growing city. I understand that with the UC and its education as well as our hard working small businesses we can grow and expand Merced to become a major powerhouse in California. We've seen the UC bring brilliant people. Those who would like to find employment in business, marketing, and in the near future now even medicine. Well one of my ambitious goals is to provide these students with employment here in the city. To keep their talents in house. I bring a healthy business mindset to the city. I want a new silicone valley in the heart of Merced.

6. This space may be used for any other information you feel is pertinent.

There's a lot of talented working people in the city. I would like to be apart of the doers and not sayers. I would like to bring me, a person with an average background to the table. I who have excelled academically through out all my phases of education, yet dropped out of college to provide for my family. I understand the books and know the blue collar life. I see both ends of the aisle.
