Additional Comments/Descriptions:

Annexation Pre-Application

GENERAL INFORMATION ABOUT ANNEXATION PRE-APPLICATIONS

Annexation Pre-applications are different from regular pre-applications that are only reviewed by City Staff in that Annexation Pre-applications are also reviewed by the City Council and Merced County Local Agency Formation Commission (LAFCO) staff to provide early guidance on annexation requests.

MATERIALS TO SUBMIT (Checklist)

One copy of all required plans or documents below shall be submitted along with the completed application and fee. Any other pertinent information that will assist staff in reviewing your proposal should also be submitted. (A digital copy of all plans or documents in Adobe pdf format shall also be submitted on a CD/DVD or by email; sorry, no flash drives can be accepted.)

Boundary Map of Proposed Annexation Area with following: Identification of properties within the proposed project boundary that are owned/controlled by other than the applicant (if applicable); Number of acres within the proposed project boundary; Existing City of Merced General Plan Land Use Designations Existing Merced County Zoning Attachments 1-9

Conceptual Land Use Plan with Proposed General Plan and Zoning Designations and Accompanying Acreage and Development Capacity for each Proposed Use Type (e.g., number and type of residential units, building square footage for non-residential use types including commercial or industrial development); Attachments 10-20

Project Phasing and Projected Phasing Schedule. Applicants are encouraged to specify a first and one or more subsequent phases to support City Council flexibility in allocating limited City resources to the project; Within Cover Letter

Estimate of Wastewater, Water, and other Infrastructure Demands per Development Phase expressed in equivalent dwelling units and Estimated Demand per development phase; Attachments 21-26

Illustrated Plans/Elevations (if available) and Narrative about Project Design Features that demonstrate quality of design; None

Estimated Number of Jobs to be created based on accepted job density factors and/or end user-specific information; Within Cover Letter

Description of Community Benefits being offered with Narrative about the need for/basis of the proposed benefits. Examples of community benefits might include construction/funding of infrastructure or public facilities, housing/recreation/job training programs, environmental benefits, etc. beyond what development typically provides; Within Cover Letter

Description of Proposal's Consistency with the General Plan and with the Merit Criteria (see page 3); Within Cover Letter

Summary of Applicant/Developer Experience with delivering/facilitating development and representative evidence to support experience such as project photos, site plans, development agreements, entitlement approvals, letters of recommendation, etc.; Within Cover Letter

Project Financing Strategy/Evidence of Existing/Potential Funding; Within Cover Letter

Annexation Pre-Application Fee (See below)

Number of Registered Voters within Project Boundary; and, Within Cover Letter

List of Public Services and Utilities being requested from the City and preliminary assessment of how services and utility costs to the City would be funded. Within Cover Letter and Attachments 27-28

Description of Project "Readiness" which might include environmental clearances for wetlands or wildlife habitat, completion of special studies related to environmental impacts, the ability to proceed without delay, etc. Within Cover Letter

(Optional) The LAFCO Justification of Proposal Questionnaire (Below, Pages 4-6)

July 26, 2022

Kim Espinosa, Planning Manager City of Merced Development Services Department 678 West 18th Street Merced CA 95340

RE: Baxter Ranches, LLC. Pre-Annexation Application

Dear Ms. Espinosa,

On behalf of our client Baxter Ranches, LLC., attached is the Application for Annexation Pre-Application of 161.05 acres north of Bellevue Road, east of the Old Yosemite Valley Railroad right of way and west of Fahrens Creek.

Although a conceptual layout within the subject properties was included in the approved Bellevue Ranch Master Development Plan, the properties were not included in the annexation to the City of Merced. The Bellevue Ranch Master Development Plan included a re-alignment of Fahrens Creek. Upon masterplan development the creek was not allowed to be re-aligned per the U.S. Army of Corps of Engineers. The proposed land plan within this application reflects the existing Fahrens Creek channel in its current alignment.

We feel this project is a high priority project ready to provide much needed housing benefits, improve traffic circulation and currently has the infrastructure in place to supply the project with City services. Our application demonstrates the capacity to provide the annexation with said City services.

The proposed annexation site is approximately 161 Acres, containing 8 parcels. The existing parcels to the east are included in a separate annexation application entitled "M" Street Annexation. If approved the two annexations would fill in a "peninsula" of land on the north side of Bellevue Road connecting the northwest portion of Bellevue Ranch to Bellevue Road.

The site presently consists of ranchettes, almond orchards and a horse ranch.

General Plan Consistency

Consistent with the General Plan the annexation proposes a Pre-Zone of 580 single family residential lots, 9.35 Acres of dual use Park/Basin, 3.6 Acres of Parkinson Drain open space and 1.48 Acres of Fahrens Creek open space with a Planned Development (PD) overlay. A floating school site is shown on the General Plan. A school site is proposed within Bellevue Ranch north of Bellevue Road and the School District has purchased a school site within Bellevue Ranch West to the south of Bellevue Road, more Baxter Ranches, LLC Pre-Annexation Application July 26, 2022 Page 2

specifically, the northwest corner of M Street and Arrow Wood Drive. The proposed single family residential lots vary in size from 5,000 sf to 11,675 sf with an average area of approximately 6,378 sf. The annexation area anticipates four phases of development to coincide with each quadrant bisected by R Street (north and south) and a quarter mile collector (east and west). Phasing is subject to change driven by market demand at the time of development.

Wastewater Demand

Estimated wastewater demand from the annexation area based on land use is 116,000 gallons per day (average daily flow) with a peak hour flow of 266,800 gallons per day. The calculated total annual wastewater flow is 130-acre feet per year. The project will install various sized gravity lines into a Sanitary Sewer Lift Station wastewater and force main a waste discharge line into the Bellevue Ranch Sewer System.

Water Demand

Estimated water demand is similar to the wastewater demand. The Average Daily Demand is 116,000 gallons per day. Minimum Daily Demand is 220,400 gallons per day. Peak Hour Flow is 324,800 gallons per day.

Storm Drain System Requirements

The project site was separated into four quadrants for storm drainage purposes. Each quadrant is tributary to its own boundary and captured in a dual use park basin. As storm water is collected the intend is to meter the detained water from each quadrant into a backbone storm drain line flowing into a storm drain lift station which will discharge metered flow into the relocated Parkinson Drain. The volume required for each quadrant is as follows: Quadrant one 3.17-acre feet. Quadrant two 2.96-acre feet. Quadrant three 2.74-acre feet. Quadrant four 2.86-acre feet for a total volume of storm water capture of 11.75-acre feet.

Job Creation

Single family residential development generally creates about 15 jobs for every one million dollars in construction costs. A 100-lot subdivision would roughly generate 100 jobs or an average of one job per lot.

Home building also creates jobs. National Association of Home Builders (NAHB) estimates that building 100 single family homes generates 300-year long jobs. The job impact on housing is broader than just home construction. The jobs created with new home construction generate an additional 50 percent of

Baxter Ranches, LLC Pre-Annexation Application July 26, 2022 Page 3

jobs in non-construction fields. The other new jobs show up across the rest of the economy because of home construction.

Community Benefits

Community benefits for the annexation include improved traffic circulation within the project area, parks and recreation and much needed housing including a variation of the required levels of affordable housing. The fees generated from the project, developer contributed funds and PFFP identified segments will ensure major infrastructure will be installed servicing not only the project site but will provide future improvements for adjacent properties.

The annexation area is contiguous to the current city limits and is within the Sphere of Influence (SOI) and the Sphere of Specific Urban Development (SUDP). The project lands form a logical and efficient city limit by annexing an unincorporated peninsula. The land uses proposed with this application is consistent with General Plan Land Uses. The Annexation Area can be served by city sewer, water, storm drain, fire and police protection, parks and streets systems to meet acceptable levels of service.

Developer Experience

In 1984, Greg Hostetler and his late wife Cathie, formed Ranchwood Homes Corp. which has provided new homes for San Joaquin Valley residents for over four decades. Together they built homes in Atwater, Madera, Dos Palos, Gustine, Los Banos, Newman and Merced.

Prior to starting a home building business, the Hostetler's farmed cotton, hay and alfalfa in the greater Los Banos area, and continue to own and operate several diversified farming companies today. These entities farm thousands of acres of agricultural land throughout California including Merced County, Yolo County, Los Banos, Merced, and Winters which includes permanent crops such as almonds, pistachios and grapes as well as other crops such as alfalfa, wheat, oats and others.

Greg's affiliated companies include offsite construction, grading, underground infrastructure, joint utilities, landscaping, recycled materials, trucking, resale homes, property management and rental homes to name a few.

Greg is the developer/builder of numerous residential projects in all parts of The City of Merced and Master Developer of Bellevue Ranch since 2012.

Public Financing Strategy / Evidence of Existing / Potential Funding

The City of Merced's Public Facilities Finance Plan (PFFP) and Development Impact Fee (DIF) are one-time charges on new development, collected and used by the City of Merced to fund the cost of public facilities necessary to serve new growth. Existing Fee Categories include:

Baxter Ranches, LLC Pre-Annexation Application July 26, 2022 Page 4

- Roadways, Bridges, and railway crossings
- Traffic signals
- 🔶 Fire
- Police
- Parks, Recreation and Bikeways.
- Roadway improvements identified in the PFFP Fee Program are Bellevue Road, R Street, traffic signals and bikeways along Fahrens Creek.

The remaining infrastructure costs shall be borne by the developer. The developer can choose to privately fund said improvements or create a finance district (CFD) to sell bonds, pay for backbone infrastructure and place a tax on the developed parcels for re-payment of said backbone infrastructure.

Registered Voters

There are currently 5 registered voters within the proposed annexation area.

Public Services and Utilities Request

The applicant is requesting public services and utilities from the City of Merced. Those utilities include sewer disposal, water supply, storm drainage, police protection, fire protection, refuse and garbage collection and disposal, street maintenance, streetlights, park and recreation, park and open maintenance, traffic signals, signs and markings and landscape maintenance. The project will create or join a Community Facilities District (CFD) to pay for said services and maintenance typical of new development.

Project Readiness

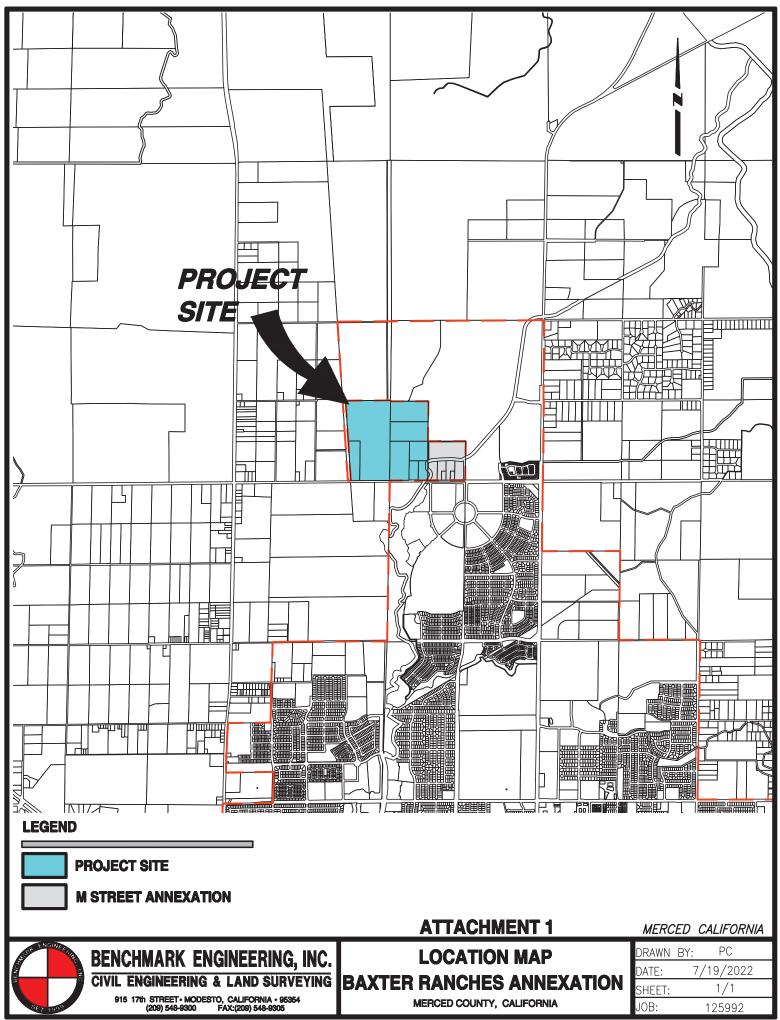

The project is currently farmed or ranchettes with no wetlands or biological habitat. Special studies yet to be performed would be traffic, air quality and greenhouse gas. Sewer, water and storm drainage is serviceable to the project site. The project is ready to be annexed to the City of Merced.

Please feel free to contact me with any questions or comments or if you need additional information.

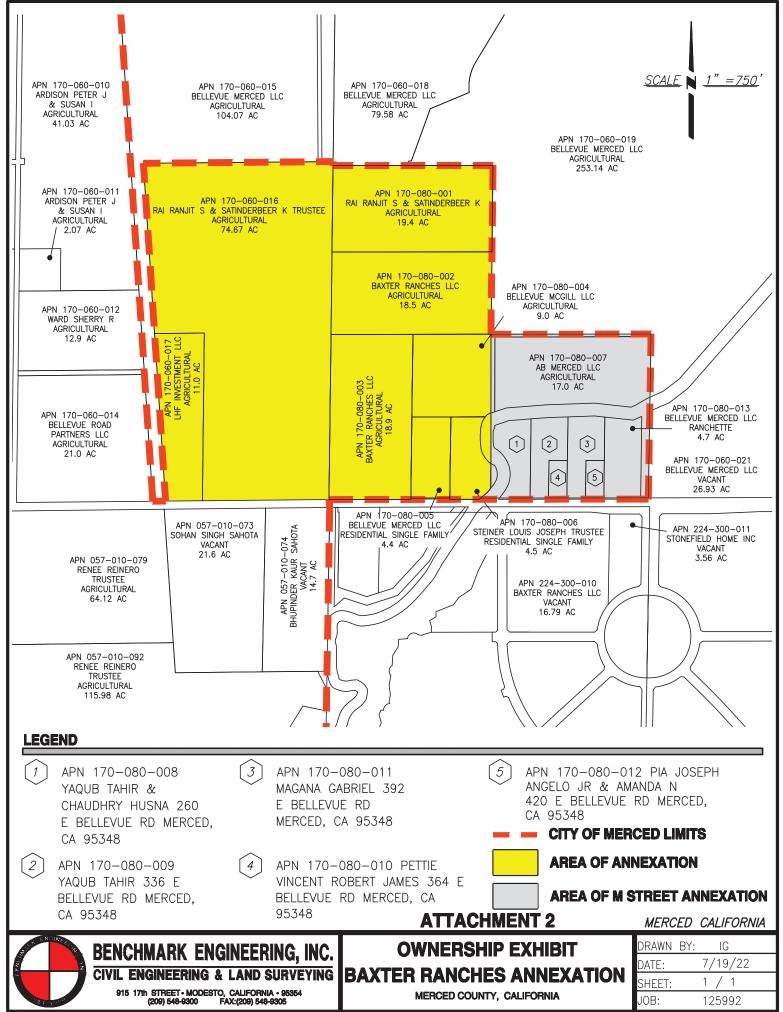

Sincerely. f munnert

Rick Mummert President

Baxter Ranches Annexation Basin Calculations

Date: 6-8-2022 Job No: 125992

The following calculations are prepared to determine the capacity of the proposed Storm Drainage Basin for the Baxter Ranches Annexation located in Merced, CA. These calculations will reference the Basin Design Calculations for Provence Subdivision.

Interruptible Outlet Basin Volume Requirement

 $Vol_{REQ} = \frac{VAR}{12}$ (City of Merced Std. SD-15) $Vol_{REQ} =$ The required inflow volume in acre feet V = The volume coefficient A = The contributing area in acres R = The total rainfall in inches for the storm period of 100 years. Per NOAA Atlas 14 R = 3.50in per 24 hours @ 100 year storm

Shed Areas

NW: A = 27.20 Acres
NE: A=25.39 Acres
SW: A=23.54 Acres
SE: A=24.55 Acres
Total Acres = 100.68 Acres
Low Density (single family): V = 0.4 coefficient

$$Vol_{REQ} = \frac{V x A x R}{12}$$

CIVIL ENGINEERING & LAND SURVEYING

915 17th Street • Modesto, CA 95354 • 209.548.9300

Northwest Quadrant

$$Vol_{REQ} = \frac{(0.4)(27.20)(3.5)}{12}$$

Vol_{REQ} = 3.17 Acre-ft = 138,085 C.F.

Northeast Quadrant

$$Vol_{REQ} = \frac{(0.4)(25.39)(3.5)}{12}$$

Vol_{REQ} = 2.96 Acre-ft = 128,937 C.F.

Southwest Quadrant

$$Vol_{REQ} = \frac{(0.4)(23.54)(3.5)}{12}$$

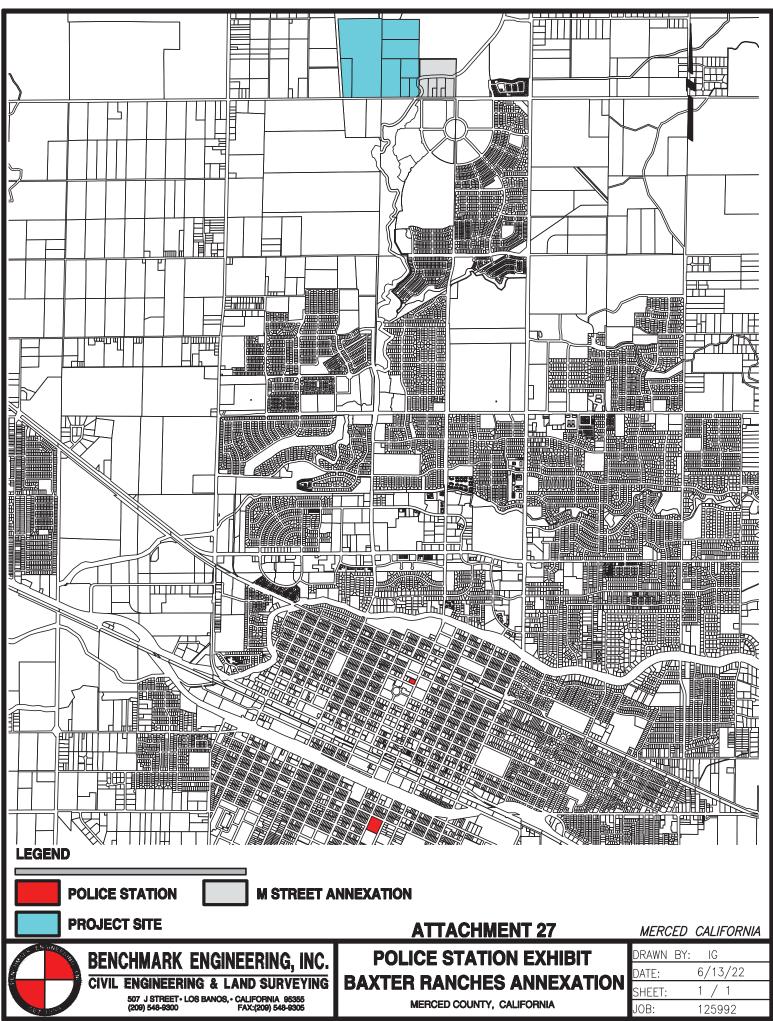

Vol_{REQ} = 2.74 Acre-ft = 119,354 C.F.

Southeast Quadrant

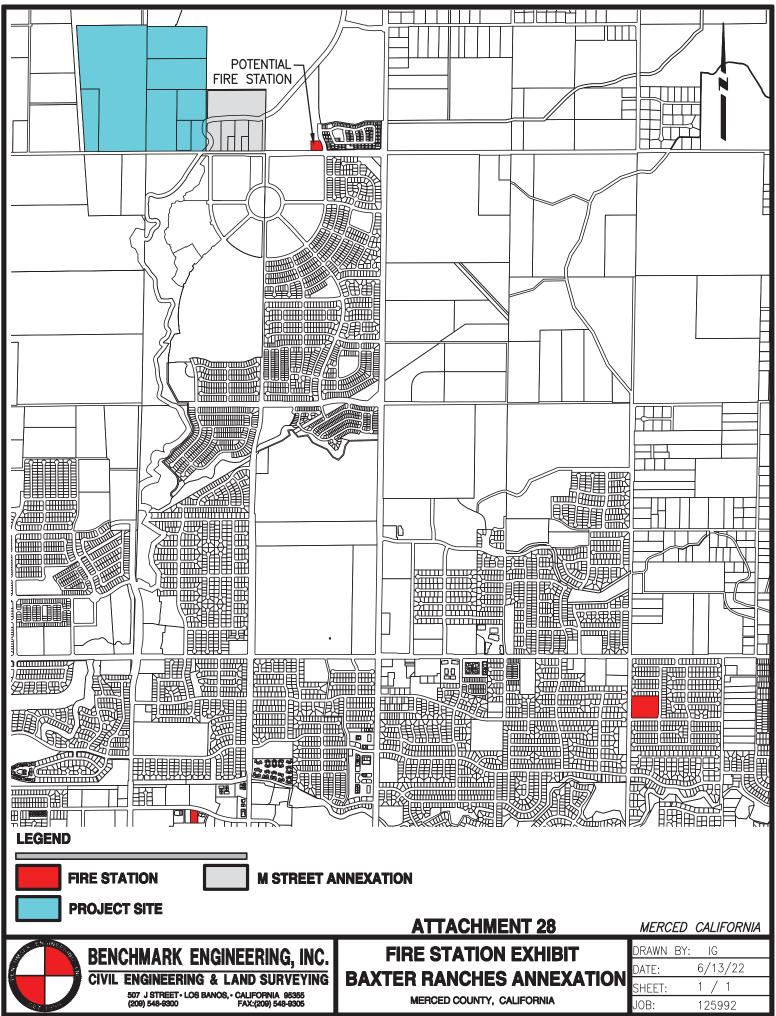

$$Vol_{REQ} = \frac{(0.4)(24.55)(3.5)}{12}$$

Vol_{REQ} = 2.86 Acre-ft = 124,582 C.F.

Baxter Ranches Annexation Total Vol_{REQ} = 11.75 Acre-ft = 511,830 C.F.
