Comments:

Client is migrating to the Badger BEACON meter reading system. This system is fairly new and SunGard does not yet have an interface specifically designed for it. SunGard will do the following:

- 1) Provide a new base SunGard Badger BEACON meter reading download/upload interface for routine meter readings per specifications document titled "BEACON Data & mapping 031215.xlsx" plus the companion document titled "BEACON Layout Additional Data.docx". While the BEACON file layout has fields for exchanged meters, the SunGard enhancements for this System Change Request will pertain to routine meter readings only, and will not support using this file layout for uploading meter exchanges to CIS.
- 2) Using the same Badger documentation, provide a new base SunGard BEACON sync file that will be a full dump of installed meters, and set this module up so that this sync file is refreshed at the end of each CIS update process. This file can be imported into the Badger system at will to populate their database with current CIS information.

NOTES:

- Client agrees to test this modification within 30 days of delivery. Failure to test within 30 days may require an additional quote.
- Client is responsible for the creation and maintenance of a Test environment when the mod requires file updates or 3rd party interfaces. This is to ensure that an agreeable outcome is reached before impeding their daily business activities or their live data. Failure to test the modification in a Test environment may require an additional quote for any additional services.
- Quote assumes that the client is running Extranet or SSH. If the client's system is not running Extranet/SSH or is only accessible through SecureLink,

an additional quote may be required.

- Client is responsible for providing Extranet or SSH access to any and all environments that modifications may need to be loaded to. Client is also responsible for providing TELNET access to any Test environment(s).
- This work will be based on the current version (9.1) and may require that the client load this version as part of the SCR.
- Any additional work, not included in the scope of this agreement, may require an additional quote.
- Services will not be scheduled until a signed quote has been received. Based on current backlog, work signed today is expected to start May 9th, 2016
- If Custom Modification, then the estimated future cost for retrofitting this work is \$100.00 per object.
