Care shall be taken to prevent wasting water, causing soil erosion, or allowing seepage into existing underground improvements or structures.

The contractor shall, at no cost to the City, keep controller or valve boxes free of dirt and debris; repair, replace, clean, adjust, straighten, raise or lower the following sprinkler system components as it relates to maintenance of the landscape areas:

1. Sprinkler heads;

Approximately thirty (30) days prior to the termination of the contract, a comprehensive test of all irrigation systems shall be made by a Public Works Department representative. Any repairs deemed the contractor's responsibility shall be made by the contractor prior to the end of the contract period.

If repairs made are not to the satisfaction of the Director of Public Works or his designee, deductions shall be made in the final contract payment to cover the cost of eliminating the discrepancies determined by the Director of Public Works or his designee.

EXHIBIT A

C. Repairs

Irrigation systems which are damaged or altered in any way as a result of work performed under this contract shall be repaired or replaced in kind and in an approved manner by the contractor.

Repairs shall be made immediately after damage or alteration occurs, unless otherwise directed. Repairs made as a result of theft, vandalism or an act of God shall be performed by the City.

Winterization – Contractor shall winterize all exposed piping and back flow prevention devices to prevent freeze damage. All damage to back flow devices caused by freezing will be the contractor responsibility to repair or replace.

Repairs not made, or not made to the satisfaction of the Director of Public Works or his designee, will be done by others and billed to the contractor.

D. Irrigation to be accomplished as follows:

Turf and Groundcover - Turf and groundcover areas to be watered, as required, to maintain horticulturally acceptable growth and color, as well as promote deep root growth. Water to turf and groundcover areas to generally be applied between 3:00 a.m. and 7:00a.m. where possible to lower the risk of fungus in cool season turf.

Banks and Slopes - Sloped landscape areas to be irrigated Monday through Friday as required to maintain horticulturally acceptable growth and color. Best irrigation practice is to promote deep root growth with a minimum of run-off.

Shrubs and Trees - Shrubs and trees to be irrigated as needed to maintain horticulturally acceptable growth and color.

Irrigation rates to be adjusted according to shrubs or tree types and seasonal weather conditions. Deep watering for root growth is encouraged, and surface run-off to be kept at a minimum.

Also, weed abatement shall be completed around the entire property of the Central Police Station, South Police Station, and Police Warehouse.

Until young trees are strong enough to stand alone, they shall be flex-tied between two approved 2-inch by 2-inch by 8-foot treated tree stakes. Split plastic hose or black tire casing held in place by 12-gauge wire shall be used to secure the young trees. Tree ties to be inspected often for signs of girdling or abrasion.
