CITY COUNCIL PRIORITIES

Public Safety as provided for in the 2020-21 Adopted Budget.

DISCUSSION

Radio communications serves as one of the most critical roles in determining the outcome of any given emergency incident. Poor radio communications predictably lead to a confused scene which affects critical operations and more importantly, firefighter and public safety.

Due to lack of funding, the fire department has worked with a piecemeal and under-resourced radio communications system with issues such as failed communications because of topography; antenna placement; and too few radio repeaters.

The Fire Department was just notified that its grant application was approved and is being awarded a Fiscal Year 2018 State Homeland Security Grant Program (SHSGP) grant through the Merced County Office of Emergency Services (OES) in the amount of \$7,448.04. The funds will be used towards the purchase and installation of \$7,448.04 of two (2) vehicular repeaters (Attachment 1).

The Fire Department will acquire two (2) vehicle repeaters to increase the coverage of the firefighter's radios when operating on an emergency incident and thereby improving firefighter and public safety.

Within the parameters and requirements of the grant program, the FY 2018 Office of Emergencies State Homeland Security Grant Programs - Equipment, Planning, Administration, Training and Exercises Agreement and the FY 2018 Grant Assurances Agreement have been previously completed.

IMPACT ON CITY RESOURCES

The acquisition of the purchase and installation of the vehicular repeaters will be entirely sub-vented using grant funding. Pooled cash will be utilized to cover the appropriation until grant funds are reimbursed.
