DISCUSSION

The Merced Fire Department (MFD) utilizes Xerox's FireHouse (FH) Software as its fire and Emergency Medical Services records management system. Since acquisition of the software, the MFD has expanded its use of the software into many different fronts (business inspections, inventory management, tracking, and data analysis). Most recently, to create time efficiencies, staff began a pilot project utilizing iPads to document inspections. To avoid any learning curves during the iPad pilot project, the MFD utilized Xerox's "Platinum" premium support on a trial basis and at no cost to the department. Based upon MFD's experience, one of the primary benefits derived was the assignment of a Dedicated Account Coordinator (DAC)". The DAC is a highly knowledgeable technical support liaison who expedites any issues encountered, and during our pilot project, it was evident that the benefits derived from the utilization of a DAC would far outweigh its cost. It is anticipated that the DAC can further assist us in developing other methodologies to create further efficiencies in time and cost to the department.
